

SMARTGOV

The power of integration
in one module

Smarter control. Smaller footprint.

The SmartGov goes beyond a pressure governor, combining governor functions, foam controls, and upgrade-ready capabilities into one intuitive interface that simplifies pump operations.

Streamline your pump panel:

Free up pump panel space by consolidating multiple controls into a single compact unit.

Simplify pump operations with an intuitive, glove-friendly interface designed for reliability.

Modernize your apparatus with a module built to integrate seamlessly with future upgrades and emerging pump-panel technologies.

TOUCHSCREEN CONTROL, BUILT FOR THE FIREGROUND.

The glove-capable 7" UV800 touchscreen clears space while enhancing visibility and control. Key features include:

- ✓ Tank level indicators and digital master gauges combined in display
- ✓ Foam controls and foam tank monitoring (when optioned)
- ✓ Automatic tank-to-pump
- ✓ Voltage and water pressure monitoring and truck voltage alerts
- ✓ Up to 3 camera views around the apparatus
- ✓ Twister for remote throttle control
- ✓ Optional pump health sensor package (oil pressure, coolant temp, anode health)
- ✓ SAM BOOST upgradeable
- ✓ FireLink ready

Future-proof your fleet

Extend the life and performance of your apparatus with upgrade-ready enhancements:

SAM BOOST: Automate waterflow control for faster, more coordinated pump operations. Adding Smart Nozzles gives nozzle operators more control and real-time data.

FireLink by Captium: Monitor apparatus health, troubleshoot with real-time data, and streamline maintenance—keeping your fleet in service longer.
