

MULTIPLY YOUR FORCE, FAST

**Smarter Waterflow for
for the Trucks you have.**

SAM BOOST brings automated waterflow to your existing apparatus, so crews get water faster, with less pump panel workload. **Clarity when moments matter.**

INSTALLED
IN AS FEW AS

**3-5
DAYS**

Why SAM BOOST

Keeps waterflow steady, so crews can commit without hesitation

Faster initial attack

Reduce the pump panel workload

2x

Double the productivity of the first crew

Consistent pressure on attack lines

The Difference on Scene

Without SAM	With SAM
<ul style="list-style-type: none">• Manual pump operations• Slower first water• Operator tied to the panel	<ul style="list-style-type: none">• Automated pressure control• Faster water to the door• Operator free to support the crew

What SAM BOOST Does

- ✓ Automates critical pump functions
- ✓ Manages pressure during the first attack
- ✓ Reduces pump tasks during the most critical minutes

Built to Multiply Force, Not Complexity

SAM BOOST supports the decisions crews already make, connecting people, equipment and waterflow in the moments that matter.
