

# S 120 E MINI CUTTER FOR BIG MISSIONS IN TIGHT SPACES

PART #: 272004000-1  
272004000-2

**THE RELIABILITY YOU DESERVE.  
THE FLEXIBILITY YOU NEED.**

## PROVEN TOUGH

Steering wheels, pedals, and seat belts are no match for the Mini Cutter's powerful blades, shown to cut through a lock size 12 and a grade 43 hardness chain in extreme extrication tests.

## EFFORTLESS OPERATION

Easy one-handed positioning, an automatic LED light, and a push-button start mean you can focus on the rescue at hand, not the tool in your hand. We keep it simple to make your hard work just a little easier.

## HEAVY DUTY, LIGHTWEIGHT

Save your energy for the moments that matter with an ultra-lightweight but durable design that means you'll always be ready to rescue without ever being weighed down.

## POWER IN YOUR PALM

A compact size means the Mini Cutter is smartly made to move with you, not against. At just about 8 pounds, you can keep it in your toolkit for when it's go time.

As tough as the rescuers who put it to work, the S 120E Mini Cutter by HURST helps you get big jobs done—anytime, anywhere.
