WHAT YOU GET

2 Akron Brass SAM™
Smart Nozzles

SAM BOOST
Pressure Governor

Antenna

Auto Tank to Pump

DON'T WAIT FOR WATER.

BOOST the confidence of new pump operators + help experienced operators do more in the critical first five minutes of a fire.

CHARGE YOUR OWN LINE

When both function buttons on the nozzle are pressed, the valve opens and the line charges.

VIEW YOUR H₂O LEVEL

Blue lights show when a water source is established; then green, yellow, and red to indicate tank level.

MAINTAIN PRESSURE

Boost accounts for elevation change and ensures correct pressure for up to 300 feet of preconnected hose.

SET DISCHARGE PRESSURE

The nozzle has a pressure sensor and communicates with the BOOST governor and discharge valve to compensate for friction loss.

OVERCOME HOSE KINKS

Low pressure at the nozzle triggers an increase in pressure at the valve. If nozzle pressure does not rise, pressure in the line is increased to overcome.
